Once logged in, select the drop-down menu at the top right corner of the browser and select 'settings'

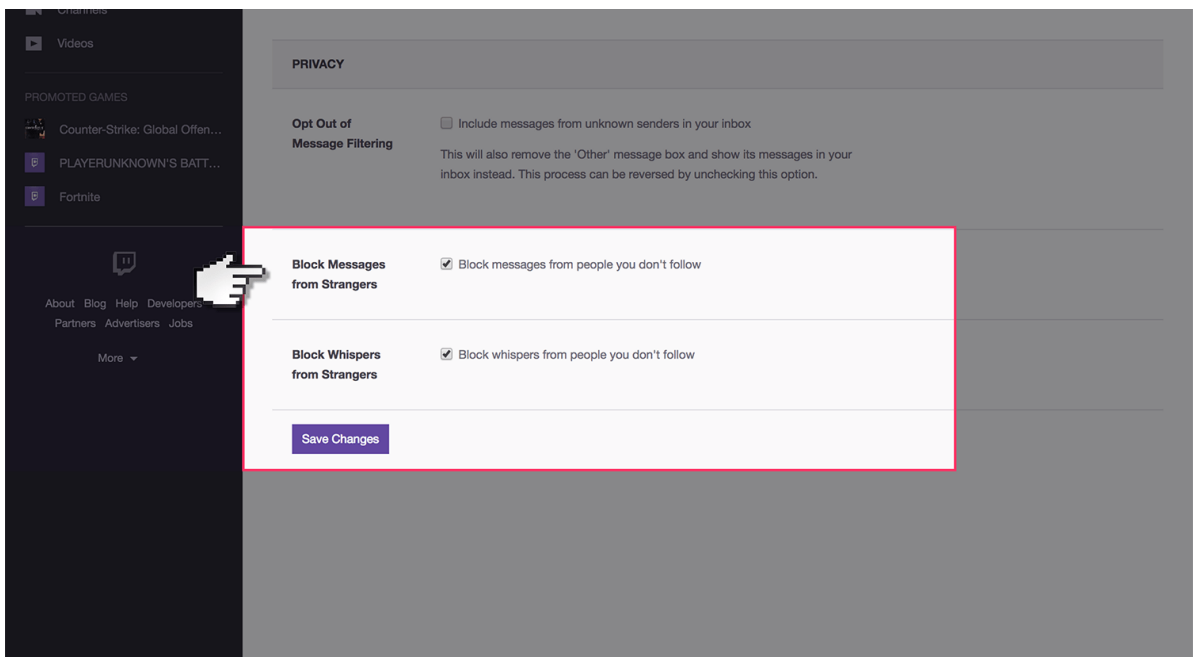

The screenshot shows the Twitch website interface. On the left is a dark sidebar with the Twitch logo, a search bar, and navigation links for Profile, Following, Messages, BROWSE (Games, Channels, Videos), and PROMOTED GAMES. The main content area is titled 'Settings' and has a red rectangular highlight around the top navigation bar. This bar includes links for Profile, Twitch Prime, Channel & Videos, Security & Privacy (which is underlined and has a hand cursor pointing to it), Notifications, Connections, and Subscriptions. Below the navigation bar, the 'Security & Privacy' section is active, showing options to 'Change Password' and 'Two-Factor Authentication'. The 'Two-Factor Authentication' section has a purple button that says 'Set up two-factor authentication'. Below this is a 'PRIVACY' section with options to 'Opt Out of Message Filtering' and 'Block Messages'.

If streaming your own videos, next go to the 'Channel & Videos' tab.

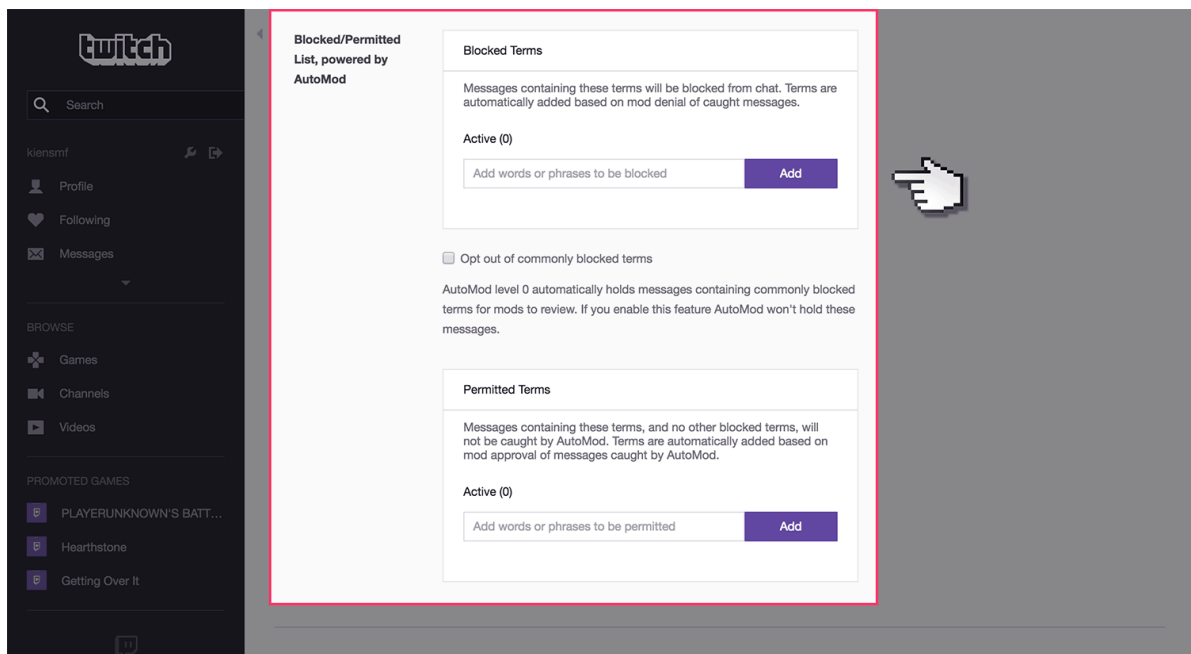

# Twitch TV guide

Under AutoMod Rulesets, select and move the slider to the right to increase moderation of content from other members on the chat box.

# Twitch TV guide

Under Blocked List box you can insert specific phrases and words you want to be blocked on the chat.

**Block Hyperlinks** ☒ Delete links in chat

Your channel's chat will automatically delete posted URLs except for the ones posted by you, moderators and admins.

**Email Verification** ☒ Require a verified email to speak

Anyone that would like to send messages to your chat room must first verify their email address

**Chat Rules**

Require first-time viewers to agree to your rules before chatting. One rule per line.

**Non-Mod Chat Delay** ☐ Off ☐ 2 seconds ☒ 4 seconds ☐ 6 seconds

Adds a short delay before non-mods see messages. Any message that is timed out or banned during the delay is removed from chat completely.
